1. **Write pseudocode and Text-Block for Printing 1 to 100**

- **Pseudocode (REPAT UNTIL)**

1. set n = 1
2. create a loop of REPEAT UNTIL
3. set the condition to n = 100
4. set the block of statement as n = n+1
5. print all of the n out each time it runs

- **Text-Block (REPEAT UNTIL)**

```
n <- 1

REPEAT UNTIL        n =100

                    n <- n+ 1

DISPLAY             n
```

- **Pseudocode (REPAT n times)**

1. set v = 1
2. create a loop of REPEAT n TIMES
3. set the n to 100
4. set the block of statement as n = n+1
5. print all of the n out each time it runs

- **Text-Block (REPEAT n times)**

```
v <- 1

n <- 100

REPEAT    n        TIMES

                   v <- v +1

DISPLAY   v
```
